November President's Letter By Kathy Garlick

November is upon us and the month of giving thanks. I will go first, I am thankful for all of you. Hibernating for the winter is not an option for woodturners. Get out to your shop and bring your best to our show-and-tell! You know fall and winter is the best time to hone your super turning skills and practice all of those things we have learned from our demonstrators this year such as texturing, color, piercing, hollow-form, and multi-axis turning to name a few.

Last month the Board of Directors of the SPSW voted to raise membership dues for the 2026 year due to the rising costs all around. It was necessary to keep our group solvent and growing into the future. The model that was proposed at the membership meeting seemed cumbersome and confusing to many. We have revised the membership to a flat $55 annual membership. According to our By-Laws, memberships are annual beginning on January 1 of each year. We do accept payments if you would like to pre-pay for your membership.

As always, we accept donations to the club at any time. As a 501(c)(3) charitable organization, please know that if you need a receipt for your donation, reach out and we can make sure you get one.

Happenings this month:

- November is the month of our Annual Board of Directors Elections.
- We welcome our demonstrator this month, Michael Poirier and his presentation on everything about sharpening.
- There is no President's Challenge in November.
- December is our annual Holiday Party and Pot Luck dinner.
  - Raffle - Name in the tin for helping with set-up/clean-up, show and tell, President's Challenge, Newsletter articles
  - Gift Exchange - doesn't have to be a wood turned item, but it is nice (participation optional)
  - No door prizes this year (wood blocks)
  - General raffle for prizes, all in attendance get a ticket
  - If you won a President's Challenge in 2025 please bring your winning piece so we can have them all together for everyone to see.
  - Also, bring your best turned item in 2025. Must be start to finish in 2025.
- If you haven't had a chance to stop at our membership table or store, please come on by this is the last chance for this year.

Looking forward to the workshops in 2026 they all sound amazing! Thank you Ed for coordinating them!

As Always, Happy Turning!

Kathy

Reminder: The ticket tin at the membership table is for those who help out each month with set up, take down, general helping as listed on the tin, bringing a President's Challenge Piece, bringing a Show-and-Tell item. Each one of these things gets you one ticket. (Just sign your name on the back and put it in the tin.) These tickets are for our Christmas Party Participation raffle. We have some wonderful items being collected throughout the year.

Thank you to all of you who have volunteered to help and those who keep on pitching in. You are appreciated immensely. I look forward to seeing you all this month at our meeting. Bring a friend and introduce them to this great group of individuals.

Table of Contents

Putting it bluntly, Every Woodturner Needs Sharp Tools!

After using that new bowl gouge, spindle gouge, skew or negative rake scraper for your latest project you may have noticed that the shavings no longer curl off the edge. Maybe you notice the shavings are somewhat dusty, or the surface finish is a bit fuzzy in places. Looking closer you find that dreaded wood disease, tear-out-itis.

In the beginning, sharpening is a mystery for all of us turners. For some, it remains a mystery for much longer than need be. Learning to sharpen your tools is as critical as learning to ride the bevel.

Fortunately for South Puget Sound Woodturners members who attend our November meeting, our own Director of Mentoring, Mike Poirier, will be on stage to de-mystify sharpening. He will fill the evening with information and key insights on different sharpening systems, jigs and techniques. He will show how he uses these tools to produce a sharp edge. Bring your questions.

Mike has been hosting one of our club's most valuable offerings, every Monday, mentoring at Mike's place in Covington for many years. In response to the high attendance at these sessions, Mike realized that maybe the club should add some additional sawdust session locations. One thing led to another and now the club offers Sawdust Sessions in four locations nicely distributed across our vast membership territory. Mike is undeniably an SPSW treasured Asset!

Always Turn Safe, *Ed White*
Your SPSW Program Director

In his own words – Mike Poirier

My earliest memory of woodworking was helping my grandfather straighten nails he had just taken from an old board–-now they call it recycling, like it's a new thing. I attended woodshop in Junior and Senior High School and at age 16 my summer was spent restoring a small wooden sailboat.

Upon graduation, I served in the military for 4 years and prior to my discharge my wife and I got married—54 years ago. With rising home prices and needing a place to live we believed it possible to physically build our own home. It took almost a year and has served us well since, with a couple of remodels along the way.

I stayed interested in woodworking but did not have a dedicated area to work. Towards the end of a 30-year career in Law Enforcement and with our two daughters grown and gone the decision was made to design and build my dream shop. Now I have a place to make a mess and not have to clean it up.

I began making wooden toys and, in the process, found a lathe was necessary to make some of the smaller parts. At this point I was self-taught and considered myself adequate. (Actually, I discovered I was not that good.) I joined Evergreen Woodworkers in Edgewood and was a member for about 10 years. 11 years ago, I joined SPSW for help in the overall knowledge of woodturning, not only in turning techniques, but in what tools to buy, sharpening and where to get materials and wood. On many occasions, I took advantage of the "Sawdust Sessions" and highly recommend them to all.

Table of Contents

Proposed Slate of Officers for 2025

As is required by our bylaws, we put forward a proposed slate of officers and directors for 2026 during the October meeting. The membership will vote to empanel a new board during the regular November general membership meeting. The following is a list of positions and those that have volunteered to fill those roles during 2026

1.	President	Kathy Garlick
2.	Vice-President	Ed White
3.	Secretary	Mark Gilbert
4.	Treasurer	Pam Parson
5.	Membership	Brandi Lowrance
6.	Mentorship	Michael Poirier
7.	Newsletter	Suzette Edwards
8.	Webmaster	Tim Spaulding
9.	Store Sales/Immediate Past President	John Howard
10.	Industry Coordinator/Outreach	Ethan Green
11.	Wood Rat	Devin Garlick
12.	AAW Liaison	Kent Horton
13.	IT Coordinator	Ramon Lyn
14.	Photographer	Jim Higgins
15.	Trailer	Pat McCart

Bruce Wutz

Newly elected officers and directors for 2026 will take office as of January 1st.

I would like to offer my personal thanks to each of the people that have stepped forward and committed to filling in these offices next year. I would also like to recognize both Terry Broberg and Doug Reynolds, who have filled the positions of Membership and head-Woodrat for many years. Without these selfless people, our club would not be what it is!

A Word From Kent Horton

Hello, once again, this is Kent Horton, your SPSW/AAW liaison with another message regarding the connections between these two turning focused groups. Let me again reiterate my mantra. *"If you are not a member of AAW – you should seriously consider joining. The AAW resources available to you will help you become a better woodturner if you take advantage of these offerings."*

One of the things I have appreciated receiving from AAW is their emails every couple of weeks or so under the heading "Beyond the Bevel." Each posting focuses on a specific topic. For instance, the most recent one is on chuck maintenance. A previous article I found most interesting was on using vertical segments glued at an angle to create very stunning and unusual pieces. Unfortunately, when I tried to look up the associated "how to" article on cutting the wedges necessary to create these shapes was very confusing and difficult using the AAW article locator. I ended up giving up and tried to find the information elsewhere. Too bad. AAW has got to improve this feature to make it much more user friendly. See how to on p 8 - Editor

In a recent issue of "American Woodturner" dedicated to remembering David Ellsworth, were a couple of articles I found quite interesting. First, was an article by Mike Peace entitled "Closing Up Shop for the Last Time." As I get older, I have to make some serious decisions about what needs to happen to my accumulated tools, equipment, wood and supplies when I can no longer turn due to health concerns or death. I really don't want Janyce, my wife, to have to make those decisions when she has little idea of their value or even where to start in disposing of 50 some years of accumulated "stuff." This article provides some practical suggestions for where to start in taking some "planning actions" and developing a list of tools and indicating disposition (donating to specific family members, charitable organizations or sold, either directly or through auction.) Having been in the position of having to help dispose of my father-in-law's extensive train collection, I know first hand how much easier this whole process would have been had there been a written plan in place.

The second article I found interesting was one by Alan Hund on creating a resin-cast bowl from a board. This process combines creating a wood and resin cast disc that is then cut into rings at an angle to be reassembled to form a bowl shape that can be mounted on the lathe to complete the turning and finishing. I have worked with epoxy in the past, but have not tried turning the stuff – yet something else to try. I must say, the end results shown in the article are most stunning and look well worth the effort.

Much of this issue of "American Woodturner" was dedicated to the contributions to AAW and the world of woodturning by David Ellsworth (1944-2025). Lots of testimonials to him, his vision and promotion of the woodturning community. He will be missed.

Thanks for reading. Enjoy your time at the lathe and be safe.

Kent Horton,
Director-at-Large

November Store

It is November which means that all of Santa's elves are busy in their shops busily making ornaments and Christmas presents for loved ones. If there are elves in your shop using up your supplies, I encourage you to think ahead to all the supplies and turning accessories that you might need in your shops between now and January.
The reason I mention it is that the Store Sales Table will not be open during our December meeting. So, I recommend that you stock up now on things you might need for the next couple of months.
I hope to see you all at the meeting.

Until next week, keep all those chips flying!

John Howard

See page 14 for store product list with prices.

Focused Clinic

On October 25th, we held the first Focused Clinic in my shop. These three-hour clinics are designed to introduce newer turners to unfamiliar practices and for more experienced turners wanting to get a new perspective. There are several underlying goals for these focused trainings.

The Board of Directors, under President Kathy Garlick's leadership, is very interested in increasing the value of membership. Enhancing the skills of members accomplishes that. The Board is also very interested in increasing the quality of wood donated to the club and one of the expectations is that the attendees at the first Focused Clinic will be donating well-prepared pieces to the club for our periodic sales.

The topic we chose for the first one was wood prep on the bandsaw and was well attended by six members. The clinic began with:

* Bandsaw selection and setup
* Safety equipment and practices
* Use of a sled for crosscutting round pieces
* Discussion of various shapes to be cut
* Considerations within the wood
* Cutting for a specific shape or design.

A 3" by 9" cylinder taken from a nice plum half-log that was unsuitable for bowls.

Most of the time the bandsaw was running and we were practicing what was discussed. Often, a newer turner benefits from close observation when practicing something new and small class size permits that.

Feedback has been positive and several good ideas were put forth to make the clinic better. Other topics being considered for future Focused Clinics include "tenon or mortice: how and when", "fluency with a bowl gouge", "finish cutting those pesky rough patches", "intro to hollowing", and introduction to specific tools like articulated arm or captive bar hollowing rigs, threading jigs and so forth. If you go back and reread the items listed above, you'll notice that the first three represent fundamental building blocks; that's sort of the point. We also hope members tell us what they'd like to see and above all, practice. But it doesn't end there: we believe our club has a vast reservoir of talent and this is an opportunity for others to teach and share from their strength so that we all come away with more than we arrived with.

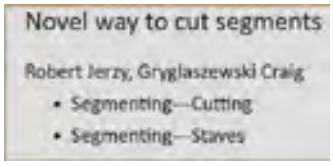
Searching Articles in American Woodturner on the AAW Site

There are a few ways to search artciles in the American Woodturner on the AAW site. Under the American Woodturner publication page, choose **AAW Explore; Article Lookup**

In the article Kent referenced on wedge assemblies. The author Robert Jerzy referenced another article by himself in volume 28 no 4. To find this article there are a few ways:

1. Find it by volume. Each year is a volume. The current volume is 40 therefor one wants to look in 2013 (40-28=12 the current year is 2025. 2025=12=2013. Go to **2010-2019** and scroll down to 2013. All the issues are listed by volume. You will find 2013 Aug 28:4. The article is in there.
2. Another way is to look by author. The author is Jerzy so in the Article Lookup, type **Jerzy** then click search. At right is a screenshot of the articles that are returned from the search. The article referenced is the second one.



3. There are other fields that can be used for searching. If you type **segmenting** into the title or subject, there is a whole list of artciles. Each one lists the author. Sadly the search is a bit weak so the article you want is not listed.
4. Try entering **segmenting** in the category. A LOT of items will be listed. Scroll down until you find the article desired.
5. If you use **segmenting** in the category and **Jerzy** in the author, it will return the same screen as in number 2.

It is possible to use any combination of those fields to get what you are looking for. Hopefully this will help with searching for articles.

South Puget Sound Woodturners Annual Program

A Rewarding Puzzle of Purpose

The journey is guided by an ever-present focus on the needs and interests of our membership. The assignment, puzzling together our annual program of demonstrators. Simply stated, what brings us all together is a common interest and passion we call woodturning. The serendipity from a found community of generous friends sharing a love for a wonderful and vast tradition of craft and creativity is what keeps us together.

We are blessed with a healthy growing membership base. Many of our new members arrive with some knowledge of woodworking and even some knowledge of woodturning. Other new members arrive with no experience of woodturning. The SPSW structure of offerings is well suited to introducing those new to woodturning to the initial fundamentals and important safety elements of this unique hobby. Hands-on experience and repetition are essential to building those basic skills. New turners surprisingly but correctly realize there are more than thousand pieces in the woodturning puzzle box. Our monthly Sawdust Sessions and two Mini-Symposiums are there to help student turners at every level of experience put those pieces in order and build their knowledge and skill puzzle.

Our monthly demonstration program complements our hands-on offerings with a focused set of presentations providing a sampling from the vast range of topics within this fascinating endeavor we enjoy. For the last two years, the journey has started with a Membership Engagement table at our Mini-Symposiums. During these engagements a good number of members shared their experience level, skill development goals and topics of interest. The first two key takeaways were the wide-ranging interests and the wide-ranging skill level within our membership. The more general but actionable takeaways from these sessions indicated:

1. a need for and interest in spindle turning fundamentals and topics,
2. a desire for woodturning baseline skills and knowledge,
3. a substantial interest in a wide range of embellishing topics and techniques.
4. Yes, bowl turning is an ever-present interest as well.

With those pieces of the program identified and turned upright, time to organize and build the program puzzle. A simple goal of 1/3 basic skill building topics, 1/3 medium skill topics and 1/3 more complicated or high skill topics strives to set the framework focused on our membership's diverse skill level.

Pulling in guest demonstrators is as essential as the oxygen in fresh air. They breath creativity and new thinking into our local community of turners. Even more critical though are our member demonstrators. Member demonstrators are needed for about five or six demonstrations a year and several more member demonstrators are needed for each of our two Mini-Symposiums. Our member demonstrators are not only the primary pieces of our Annual Demonstrator Program they are the glue that holds this puzzle together!

Member demonstrators are always needed.

Where do you fit in this puzzle?

Respectfully and passionately,

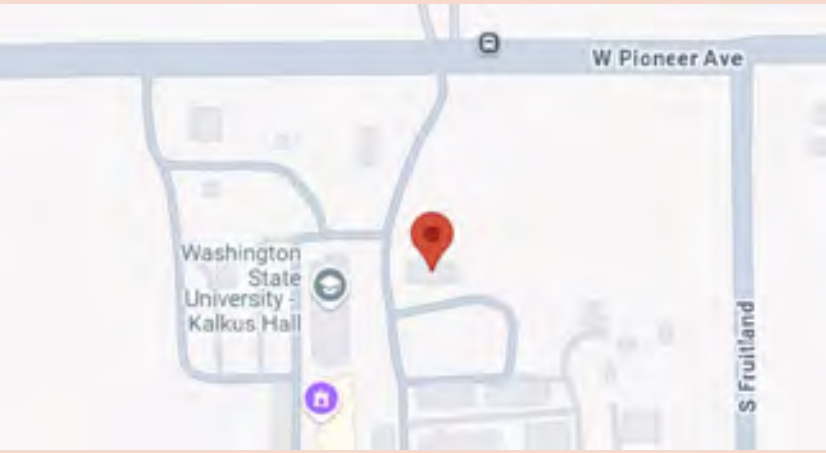
Ed White
SPSW VP & Program Director

Meeting Location and Time**:

WSU Extension in the D.F. Allmendinger Center
2607 W Pioneer Ave, Puyallup WA 98371
Social Hour 5:30 – 6:30 pm (bring your show-and-tell, President's Challenge or just mingle)

Meeting Starts 6:30 – 7:00 pm
(Announcements, show-and-tell, President's Challenge, etc.)

Demonstration 7:00 – 8:30
**If you would like to help with the set up or clean up, please plan to come at 5 or stay after and help to clean up.



If you are traveling from the north and don't want to wait out in the bumper to bumper of Hwy 167, you can travel down I-5 and take the S 72nd St Exit and head east. S 72nd turns into Pioneer and passes right in front of WSU. You might have a few stop lights along the way, but you will be turning right into WSU at Fruitland Ave, well before downtown Puyallup avoiding the atrocious fairground and bottlenecked traffic. Give it a try and let Kathy know how it worked out.

SPSW is a chapter of the American Association of Woodturners (AAW). Many of our members are just members of the chapter but not the American Association of Woodturners (AAW). **The AAW offers an introductory free 3-month trial membership to chapter members.** The free membership allows access to all online publications like The American Woodturner, Woodturning FUNdamentals magazine, and AAW e-newsletters.

Visit the website www.woodturner.org (or click the link if you are an email newsletter subscriber) and look under Membership then Join Today. Scroll to the bottom of the page. The above hyperlink will also take you there. For those who prefer to do it by phone, call 877-595-9094 M-F 8:30 to 4:30 Central time.

Table of Contents

A few additional items of business/volunteer opportunities: (Many Hands make light work)

At the meetings, we could use a hand with our show and tell, getting items in front of the cameras and also making sure that during our demonstrations that a microphone is available to audience members for questions so all can hear, even those at home.

We would like to have a few more volunteers to be able to fill in when needed for the Club Store & Membership table so it isn't too much for John and Chuck when Terry Broberg is traveling for work. If you are familiar with how the Square card reader works is a bonus for us all!

We could use a couple of extra hands with our AV/Zoom with Ramon Lyn. Set up and take down takes a lot of time for one person causing us to start a little late each month and getting out of the building after our meetings. Ramon is happy to train you on set up and take down to store our cameras and equipment. Having an extra boom operator when Ken Huff is not available is helpful.

Participation Tickets

Want more chances for prizes at the December meeting?
If you participate in **Show and Tell**, **Wood Donation**, or **Set-up / Clean-Up**, make sure you fill out a participation ticket.

2026 Membership Renewals

If you enjoy SPSW please take the time to renew your membership.

The dues for 2026 are only $55 for the entire year and that is for your whole family.

Terry Broberg, our Director of Membership, is taking dues for the 2026 year. I hope each of you will join us again for another event-filled year. I would like to encourage everyone to get your 2026 dues paid as soon as possible.

Your dues are what enable us to rent our great meeting facility, provide equipment like the new multiple camera system used to enable members to better view demonstrations in person and on-line, and purchase the tools and equipment we need to run demonstrations and sawdust sessions.

You can either pay your dues at the meeting, or an even easier method is to do it online through the members only tab on the SPSW website.

Table of Contents

We are now collecting dues for 2026. Dues for individuals or for the whole family are $45/year. We accept cash, check, Visa®, MasterCard®, American Express®, Discover® or debit card.

This is still one of the best deals around. For just $55 you get a monthly meeting featuring top notch presenters, an avenue to display your talents, and a forum to seek advice and ask questions. You have access to a group of mentors who can help you improve your skills.

Also, there is a monthly "open turning session" (our Sawdust Sessions) on the Saturday following the meeting. Use the membership application below and pay at the meeting or mail it to the address on membership form.

We now also have the option for you to join, renew, or just donate. We are a registered 501 (c)(3) non-profit organization. You can pay at the meeting, or on-line! Just go to our website (www.spswoodturners.org), fill out the form, and pay at that time.

AAW membership is separate from membership in the SPSW Chapter. Now is also a good time to sign up for the American Association of Wood turners (AAW). Annual memberships in the AAW operate on an yearly anniversary cycle, whereby your membership will start with your join date and continue until the same date the following year.

If your level of AAW membership includes a printed copy of the American Woodturners journal, you will receive six issues starting with the issue published after you join or renew.

Zoom Meeting If you haven't been on Zoom before, just follow the steps below. **(If you have been in a Zoom meeting before, just start at step 3.)b.**

1. **The Zoom meeting invitation is only sent to active members.** So, if you have not paid your dues since October 2024, you will need to go to the members tab on the SPSW website (spswoodturners.org) and renew your membership. Please note that it would normally cost more for just one of these demonstrations than your SPSW dues for the entire year.

2. Before the scheduled meeting, you need to go to zoom.com and download the free "Zoom Meetings" app. The Zoom download is quick, easy, and free!

3. **Information and Invitation Delivery Schedule:**

   a. **The Wednesday the week before the meeting** – The Zoom Meeting Invitation will go out to our active member's distribution list. (This is if we get the link by then)

      i This invitation contains a link that appears in blue letters. Just click it to join the remote demo on Thursday.

      ii Please save this where you can find it.

         1. If you don't see the invitation(s) in your inbox, then please check your "junk" or "spam" folder. If you get our newsletters, the meeting invitation should come right into your inbox.

         2. If you did NOT get the email, the link will be posted on the SPSW website under For Members/Zoom Meeting Link

   b. **The Saturday before the meeting.** – A reminder will be e-mailed to our active member's distribution list.

   c. **The day of the meeting** - Log into the meeting by 6:30pm

      i. The demo will start at 7:00pm

      ii. When you click on the link, you will be asked if you want to join with video and audio. Answer "yes" to both, then you will enter a virtual waiting room. Wait just a few seconds and one of the co-hosts will admit you into the actual meeting.

      iii. **Note:** If you have previously downloaded the app, you may see an update is available. If you see it, please update your app. Zoom is making frequent changes to the program to strengthen security.

      iv. Devices used to view the demo can be smartphones, tablet computers, laptops, etc. To fully participate, the device needs to have audio and a camera.
